What is Compass AD?

Compass is an innovative systems management tool that combines all the key elements for Active Directory monitoring and reporting – delivered in a user-friendly dashboard. Developed by Active Directory Architects who have real world experience managing and troubleshooting numerous enterprise environments, Compass is affordable, installs in minutes and will help you improve system uptime, simplify troubleshooting AD, identify and resolve DNS issues, and improve security.

The Compass main dashboard gives you a complete view of your Active Directory environment, alerting you to areas that need your attention.

Areas Monitored with Compass AD:

Real Time network monitoring of all domain controllers:

- Ensure that they are all able to communicate with users and with other DC's in the same domain, site and forest.

Name Resolution verification:

- Compass automatically validates your Domain Controller DNS settings.

Operating system monitoring:

- Components such as disk space, memory, cpu and memory storage

Continuous verification of core AD services:

- your AD is backed up

- Compass keys and eye on all the key services including:

- Netlogon
- AD Domain
- DHCP
- DNS
- KKDC
- Time

Replication Monitoring:

- Replication issues are no always easy to uncover. Compass makes it easy by notifying you if there is an issue.

AD Backup verification:

- Don't get caught with your pants down, Ensure that

COMPASS - ACTIVE DIRECTORY MONITORING AND REPORTING

Problems Solved with Compass Monitoring Solutions	
• Logon failure	• Account lockout
• Domain Controller failure	• Application failure
• Account creation failure	• Inconsistent directory data
• Security policy failure	

Compass AD Reporting

Compass protects the foundation of your network by continually monitoring and reporting on all the various aspects of Active Directory. With over 30-built in reports, Compass serves as a powerful reporting tool for AD Administrators and Help-Desk Technicians. The user-friendly, web-based interface enables users to easily manage and audit user accounts, groups, controllers and domain controllers. Keep all key members of your team informed through our award winning Personalized Dashboard views that automatically self-generate, always displaying the most current data.

Solutions delivered by Compass Reporting:

- Removes users that have inappropriate access to privileged groups (Schema Admins, Domain Administrators)
- Improve security by ensuring password enforcement
- Reduce amount of work required to submit to HIPPA, SOX and other compliance Audits
- Save time by reducing repetitive and complex tasks associated with AD Management
- Identify and remove inactive user accounts and groups
- Automate reporting activities for Help Desk and AD Administrators
